

JULIETA BACHUR

AUTOMATION ENGINEER

Buenos Aires, Argentina • +54 9 113407-7888 • julietabachur@hotmail.com

<https://dev-portfolio-jbachur.vercel.app>

SUMMARY

Automation Engineer specialized in production-grade process automation using N8N, API integrations and business logic.

I design and maintain scalable workflows that have collectively saved over 1,700 hours of manual work per year, improving operational reliability and data consistency.

Direct collaboration with end users to design efficient solutions, maintain production workflows, and translate business needs into robust technical processes.

Background in functional interface design for rapid solution validation.

WORK EXPERIENCE

Automation Engineer

June, 2024 – Present

- Design, implementation and maintenance of production workflows using N8N.
- End-to-end ownership of automation logic, including business rules, validations, error handling and performance optimization.
- Integration of internal applications and external services using REST APIs, webhooks and databases.
- Direct collaboration with end users to understand needs, define solutions, and perform functional testing.
- Automation initiatives resulting in 5,200+ manual hours saved, improving operational efficiency.
- Monitoring, debugging and maintenance of workflows affected by system changes, updates or failures.
- Management of credentials, secrets and environment variables in coordination with infrastructure teams.
- Technical reference for automation initiatives within the Digital Lab.
- Functional prototyping of solutions using Figma and Adobe XD when required for validation.

Frontend Developer

March, 2023 – June, 2024

- Frontend development of web interfaces using Angular.
- Implementation of new features and improvements through ticket-based workflows.
- Integration with backend services via REST APIs.
- Collaboration with backend and business teams.
- Version control using Git and Azure DevOps.

SKILLS

- Automation & Integrations: N8N (production workflows), end-to-end workflow design, REST APIs, webhooks, internal application integrations, Microsoft Graph (Outlook, Teams, SharePoint), credentials and secrets management, workflow monitoring and maintenance, AI model integrations
 - Backend & Databases: ASP.NET MVC (.NET Framework), Entity Framework, Java (basic), SQL Server
 - Frontend: HTML, CSS, SCSS, JavaScript, TypeScript, Angular, React.js, Next.js
 - UI Libraries/Frameworks: Bootstrap, Tailwind CSS, Material UI, Angular Material
 - Testing (QA): Jest, React Testing Library, Selenium
 - Prototyping & Solution Design: Figma, Adobe XD
 - Version Control: Git, GitHub, Azure DevOps
 - Project & Collaboration Tools: Mural, Miro, Trello, Jira
-

EDUCATION

Frontend Web Development Technical Degree - Digital House

- Graduated: December, 2024
-

LANGUAGES

- Spanish: Native
- English: C1 (advanced)
- Portuguese: Basic
